On the 7th **July, 10:00-14:30** the Regional Youth Climate Assembly (RYCA) are hosting a schools summit. We want it to be an interactive day around all things climate.

Our main aims for the day are:

1. **Networking:** Provide students with the opportunity to talk and learn directly from climate experts in small groups.
2. **Hands-on Learning:** Engage in practical workshops focused on real-world environmental issues.
3. **Empower Climate Action:** Support young people in initial planning their own climate-focused projects to bring back to their schools.

In the morning young people will have the opportunity to speak with leaders in climate and the environment about their work and careers. In the afternoon we will be running practical sessions engaging young people on the different aspects of climate action.

PLAN FOR THE DAY

10:00 - Arrival

10:20 - Start and introductions

11:00 - 'Around the World'

12:00 - Lunch

12:40 - Practical sessions

13:50 - Action Planning

14:30 - End

AROUND THE WORLD

An opportunity for young people to meet professionals in the climate space and ask questions about their work

A small group of young people speak to a professional at different tables for 5-10 mins. Then the young people would move around the room to the next.

We would love for your school and students to be involved. If you have any questions please get in touch at kathryncominse@youthworkunit.com
